

## **G. Ananda Vadivelu**

Dr. G. Ananda Vadivelu is a sustainable development research professional who is an Associate Fellow in the Green Growth Strategies Area under the Green Growth and Development Division at The Energy and Resources Institute (TERI) in New Delhi, India. At TERI, he is currently contributing to the institute's Global Sustainable Development Report and to a project on land degradation in India. His Ph.D in Economics (pursued in Institute for Social and Economic Change, Bangalore) examined institutional dimensions of watershed development in Karnataka. He has earlier worked with Institute of Economic Growth, M.S. Swaminathan Research Foundation and International Crop Research Institute for Semi-Arid Tropics. His research interests broadly are in the arena of natural resource management and specifically on groundwater governance issues. He has worked on Common Property Resources based on the data collected by the National Sample Survey Organisation (NSSO) in India and this work was published in the journal Conservation and Society.
